MediaOne 3a Studio Monitors

MediaOne 3a Studio Monitors

Whether you need a monitor system for your home recording studio, video production suite, or if you just want better monitors for gaming and listening to music on your computer, MediaOne Active Monitors are the perfect solution.

MediaOne monitors produce a powerful, full-range sound thanks to the internal 30 watt amplifier, extended range copolymer woofers and a 25mm silk dome tweeter. And they deliver solid bass response and extended highs, all in an amazingly compact cabinet.

Featuring an internal 2x15 Watt stereo power amplifier to drive both sides, the right side cabinet also houses a convenient, front control panel with volume control and headphone output, along with an auxiliary input for connecting a second signal source like an MP3 player.

On its rear panel, you'll find RCA inputs, terminals for connecting the passive monitor, power switch and AC power. The precision tuned enclosures incorporate rear venting for extended low frequency response and are finished in an attractive black vinyl. MediaOne Active Monitors are an ideal near-field monitor system for studios, video post production suites, fixed installations or wherever great sound is desired.

FEATURES

- Precision-tuned, rear-vented enclosure
