

AirLine Micro
Wireless Earset System

AirLine Micro Wireless Earset System

The AirLine Micro Wireless Earset System utilizes the latest in lithium ion battery technology and small, high-quality audio and RF components, representing a breakthrough that brings freedom and convenience to a new level of performance. The result is not only our smallest wireless system, but also our most comfortable, reliable and versatile system ever.

To eliminate continually changing batteries, Samson has designed this UHF wireless system to be fully rechargeable, supplying lithium ion rechargeable batteries and USB DC power inputs for both the AH2 earset transmitter and AR2 receiver. A handy docking station for the receiver also provides a USB DC input and a 3.5mm balanced audio output. Because of these convenient recharging capabilities, the days of constantly changing the batteries in your wireless system are over.

Leaving beltacks by the wayside, this system employs the AH2, a single earset transmitter for complete freedom and uninhibited movement. The transmitter features an omnidirectional microphone to ensure your voice is picked up and amplified even during periods of fast, heavy movement. This makes the AirLine Micro system ideal for fitness instructors as well as high-energy performers and presenters. Plus, its water resistant design protects the mic and transmitter from moisture and perspiration that can accumulate during intensely active performances.

Despite its modest size and inconspicuous appearance, the AR2 receiver boasts meticulous engineering that will provide professional sound reproduction and exceptional reliability. Like the AH2 transmitter, the AR2 also houses a rechargeable battery that will offer about 7 hours of operation. A 3.5mm balanced mic/line level output and USB DC power input round out the features on this pioneering receiver.

Elevating the convenience of micro-size wireless transmitters and receivers, the AirLine Micro Earset System packs an incredible amount of technology and innovation into small, unobtrusive components. When mobility is a factor in your performance, Samson's AirLine Micro offers the most discreet, comfortable and convenient wireless solution available.

FEATURES

AirLine Micro Wireless Earset System

- > Wireless UHF system with micro-size AH2 transmitter and AR2 receiver
- > Tone squelch and auto mute for clear operation
- > Includes a convenient system carry case
- > Includes AC adapter and charging cables

AH2 Transmitter

- > Earset transmitter and omnidirectional microphone with no beltpack
- > Lithium ion rechargeable battery (5-6 hours of operation)
- > USB DC input for recharging
- > Single button operation for power, mute and volume
- > Water resistant

AR2 Receiver

- > Low-profile wireless receiver (2.36" x 1.67" x .51")
- > Lithium ion rechargeable battery (7-8 hours of operation)
- > USB DC input for power and recharging
- > 3.5mm balanced mic/line level output

AR2 Dock

- > Provides secure base for AR2 receiver during operation and/or recharging
- > USB DC input for power and recharging (cables included)
- > 3.5mm balanced audio output
