

G-Track
USB Condenser Mic and Audio Interface

G-Track

Samson's G-Track is the world's first USB condenser microphone with a built-in audio interface and mixer, allowing simultaneous recording of vocals along with guitars, bass, or keyboard while also providing no latency monitoring through an on-board headphone output. And the G-Track allows you to switch the interface so that you record vocals only or instruments only or a mix of both.

Now singer/songwriters can directly record vocals and instruments quickly and easily with one device, making the G-Track a must have for any songwriter's home studio. And its ease of use and portability allows you to take it anywhere inspiration may strike you.

Ideal for the traveling musician or the project studio, the G-Track includes a heavy-duty mic stand, USB cable and specially developed audio cables to connect any musical instrument with a standard 1/4" output to the G-Track. The G-Track ships with Cakewalk's Sonar LE and works brilliantly with Apple's GarageBand.

FEATURES

- > Large diaphragm, 19mm studio condenser microphone
- > Mic and instrument/line gain control
- > Stereo input jacks for instruments or line level signal
- > Stereo headphone jack for no-latency monitoring with level control
- > 3-position headphone switch for stereo, mono, computer monitoring
- > USB bus-powered and compliant
- > Audio I/O and USB cables included
- > Desktop microphone stand included
- > Comes with Cakewalk® Sonar LE
